

White-Back Pure PET Roll-Up Film 220 µm - TAG Digital®

TECHNICAL DATA SHEET

Description:

The **White-Back Pure PET Roll-Up Film 220 µm - TAG Digital®** is a polyester film designed for roll-up and display applications such as pop-up systems, X-banners, clip banners and rigid posters.

Characteristics:

The product consists of a 220 µm white PET film designed for display applications.

The reverse side is white. The PET base ensures good dimensional stability and a flat appearance, making it suitable for roll-up systems.

Printing:

Compatible with solvent, eco-solvent, latex and UV inks.

Application guidelines:

Designed for use in roll-up and display systems. The material ensures easy handling and good visual rendering.

Durability:

The maximum recommended duration of use depends on application conditions and environment.

Storage:

1 year when stored between 15°C and 25°C and at a relative humidity of 45 to 55% in the original packaging.

Technical data:

Service temperature: -40°C to +165°C

Note:

The information in this data sheet is based on laboratory tests and experience gained in practice. It does not constitute a legal guarantee. A test prior to use must be carried out.

Durability is estimated based on exposure conditions in Central Europe. The actual life of the product depends on substrate preparation, exposure conditions and maintenance of the marking. Outdoor performance degradation can be expected when the films are exposed southward, if applied in areas with high temperatures such as Southern European countries, or in polluted areas.
