

White Static Cling Film 180 µm - TAG Digital®

TECHNICAL DATA SHEET

Description:

The **White Static Cling Film 180 µm - TAG Digital®** is a white electrostatic PVC film without adhesive. It is designed for application on windows and smooth surfaces such as glass, tiles, refrigerators and furniture.

Characteristics:

The product is a 180 µm flexible white PVC film designed for static application.

It is supplied with a 170 g/m² PE-coated paper liner, ensuring good handling and easy application.

Printing:

Compatible with solvent, eco-solvent and UV inks.

Application guidelines:

Apply on clean, smooth and non-porous surfaces. Wet application is recommended to avoid air bubbles and ensure optimal adhesion.

Durability:

The maximum recommended duration of use is 1 year.

Storage:

1 year when stored between 15°C and 25°C and at a relative humidity of 45 to 55% in the original packaging.

Note:

The information in this data sheet is based on laboratory tests and experience gained in practice. It does not constitute a legal guarantee. A test prior to use must be carried out.

Durability is estimated based on exposure conditions in Central Europe. The actual life of the product depends on substrate preparation, exposure conditions and maintenance of the marking. Outdoor performance degradation can be expected when the films are exposed southward, if applied in areas with high temperatures such as Southern European countries, or in polluted areas.
